

BANK OF CASHTON

Since 1899

February Issue

Transaction Control

We are excited to offer Transaction Control through SHAZAM BOLT\$. Now, within the FREE App, you can immediately block your debit card within the app. If you misplace your card or leave it behind at a restaurant, you can pause your own account until the card is found, then you can turn it back on. In these situations, you can temporarily block then unblock your debit card, rather than cancel it with the easy tap of a button. Download SHAZAM BOLT\$ from the App Store or Google Play and see what it's all about or give us a call to learn more!

6 Easy Tips To Help You Monitor Your Account!

1. Check your balance and account activity frequently

Log into your Online Banking or Enroll in Online Banking to view your balance, account history, and other information about your account(s). You can also download one or both of our mobile apps to help you with this wherever you are!

- Asset - Go to our website to learn more
- SHAZAM BOLT\$ - Go to our website to learn more

2. Review your account statement every month

Be sure to contact us if you have any questions or find an error in your checking account statement. (608) 654-5121

- Wish to receive your Statement(s) electronically? Log in and select E-Statements or call and let us know, (608) 654-5121.

3. Sign up for online alerts

Setting up e-Alerts in your Online Banking is easy. The e-Alert(s) is sent via email or text message straight to your phone.

- Some of the e-Alerts include: Low Balance, Negative Balance, Deposit Made, etc.

4. Set up a personal "No-Spend" cushion

Put a small amount of money into your checking account and keep it there from month to month, that way it could help prevent you from receiving an overdraft.

5. Sign up for overdraft protection

You can set up an automatic "sweep" transfer from another account or set up a Ready Reserve account. Interested? Call and speak to John or one of the other loan officers today, (608) 654-5121.

6. Track your spending

Keep an eye on where you are spending your money. Asset can help you with this. Within Asset, all of your transactions are automatically categorized and displayed in easy to read graphics. You can also make your own simple excel spreadsheet to see where you are spending.

- Get out your last few months' bank statements, credit card statements, and cash withdrawal statements. Create categories that align with your most obvious spending categories. Once you have that set, determine your monthly budget.

**Start using these tips to
keep track of where
your money is going and
coming from!**

Are you interested in opening a Checking, Money Market or Savings account? We have multiple options to fit your financial needs!
