Keep Your Finances In Hand With Help From Asset

The Asset App by Bank of Cashton offers unique control: understand the state of your finances instantly from your phone, tablet, or computer! The app is free to download, compatible with Android and iPhone, and integrates with online banking.

Using Asset can help you:

Know What You Spend

Tracking what you spend- and tracking it *accurately*- is the key to keeping a handle on your finances. Check your transactions in real time and categorize your spending to keep your budgets up to date.

Build Better Budgets

Budgets automatically update as transactions come in; no need to manually punch in numbers! The visual style of budgets in Asset can help you see your money at a glance and make smart spending choices.

Watch All Your Accounts

With Asset, you can add many different types of account to your dashboard. Besides your accounts at Bank of Cashton, you can add: credit cards, accounts at different institutions, car loans, mortgages, and more! Get the whole picture with Asset.

Visit the Google Play Store or the App Store and download Asset for free today!

By the Numbers...

Star Wars was released in theaters in the United States on May 25, 1977. It earned **\$461 million** in the U.S. and \$314 million overseas, totaling \$775 million. It surpassed Jaws (1975) to become the highest-grossing film of all time until the release of E.T.

Is It Safe?

Using the internet to manage your finances can be a great tool, but also a great risk. Make sure you are protecting yourself and your money online with these tips:

Never send money via social media

Even if the person you are sending to is someone you know, their account could be compromised, putting the money in a scammer's pocket.

Avoid posting too many details

The more information you post publicly online, the more opportunity is given to dishonest individuals who want to use this information to get control of your finances.

Always read privacy policies

Sure, they aren't very exciting, but a privacy policy for a site or app spells out exactly how the company will use your information. It's important to know where your data is going!
